

CONSERVATION INTERNATIONAL: SUPPORTING THE

CTI

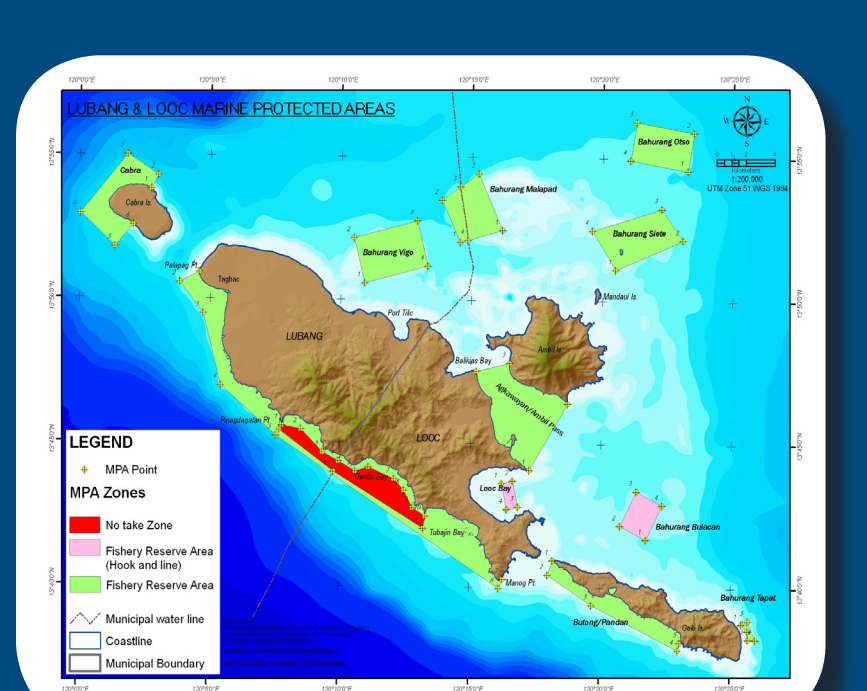

FOR CORAL REEFS, FISHERIES, AND FOOD SECURITY IN THE PHILIPPINES THROUGH THE CORAL TRIANGLE SUPPORT PARTNERSHIP

The Coral Triangle Initiative on Coral Reefs, Fisheries and Food Security (CTI) is a commitment of six nations (i.e., Indonesia, Malaysia, Papua New Guinea, Philippines, Solomon Islands, and Timor Leste - the CT6) within the Coral Triangle to support the nearly 2.3 million square miles of ocean and exceptional biodiversity. CTI has gained political support from the highest levels of governments with the heads of states of all countries agreeing to a Regional Plan of Action (RPOA) whilst national commitments are subscribed in the National Plans of Action (NPOA). Conservation International and the World Wildlife Fund are currently helping the Philippine National CTI Coordinating Committee (NCCC) meet its targets as stipulated in the Philippine NPOA. CI has been working at various levels of governance to fast-track the realization of goals for the Philippines in the CTI under the Coral Triangle Support Partnership (CTSP) Program funded by USAID.

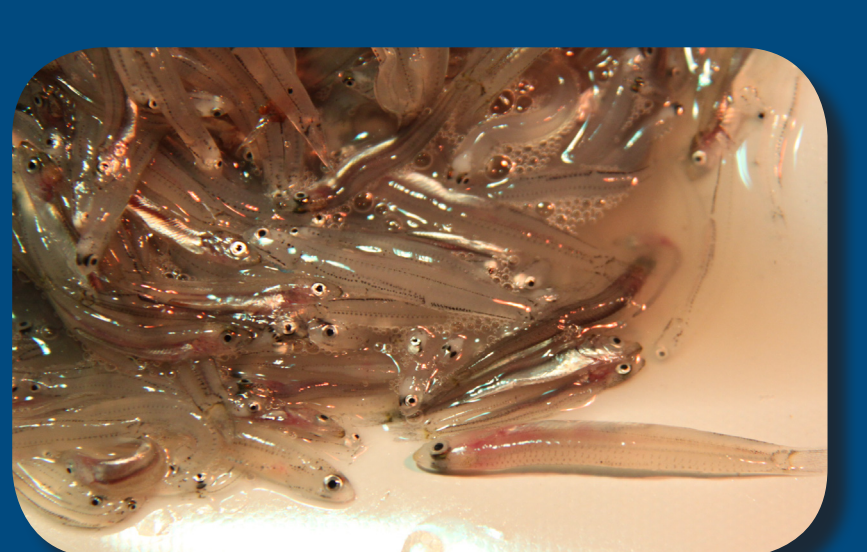

Working at local scales: The Verde Island Passage...

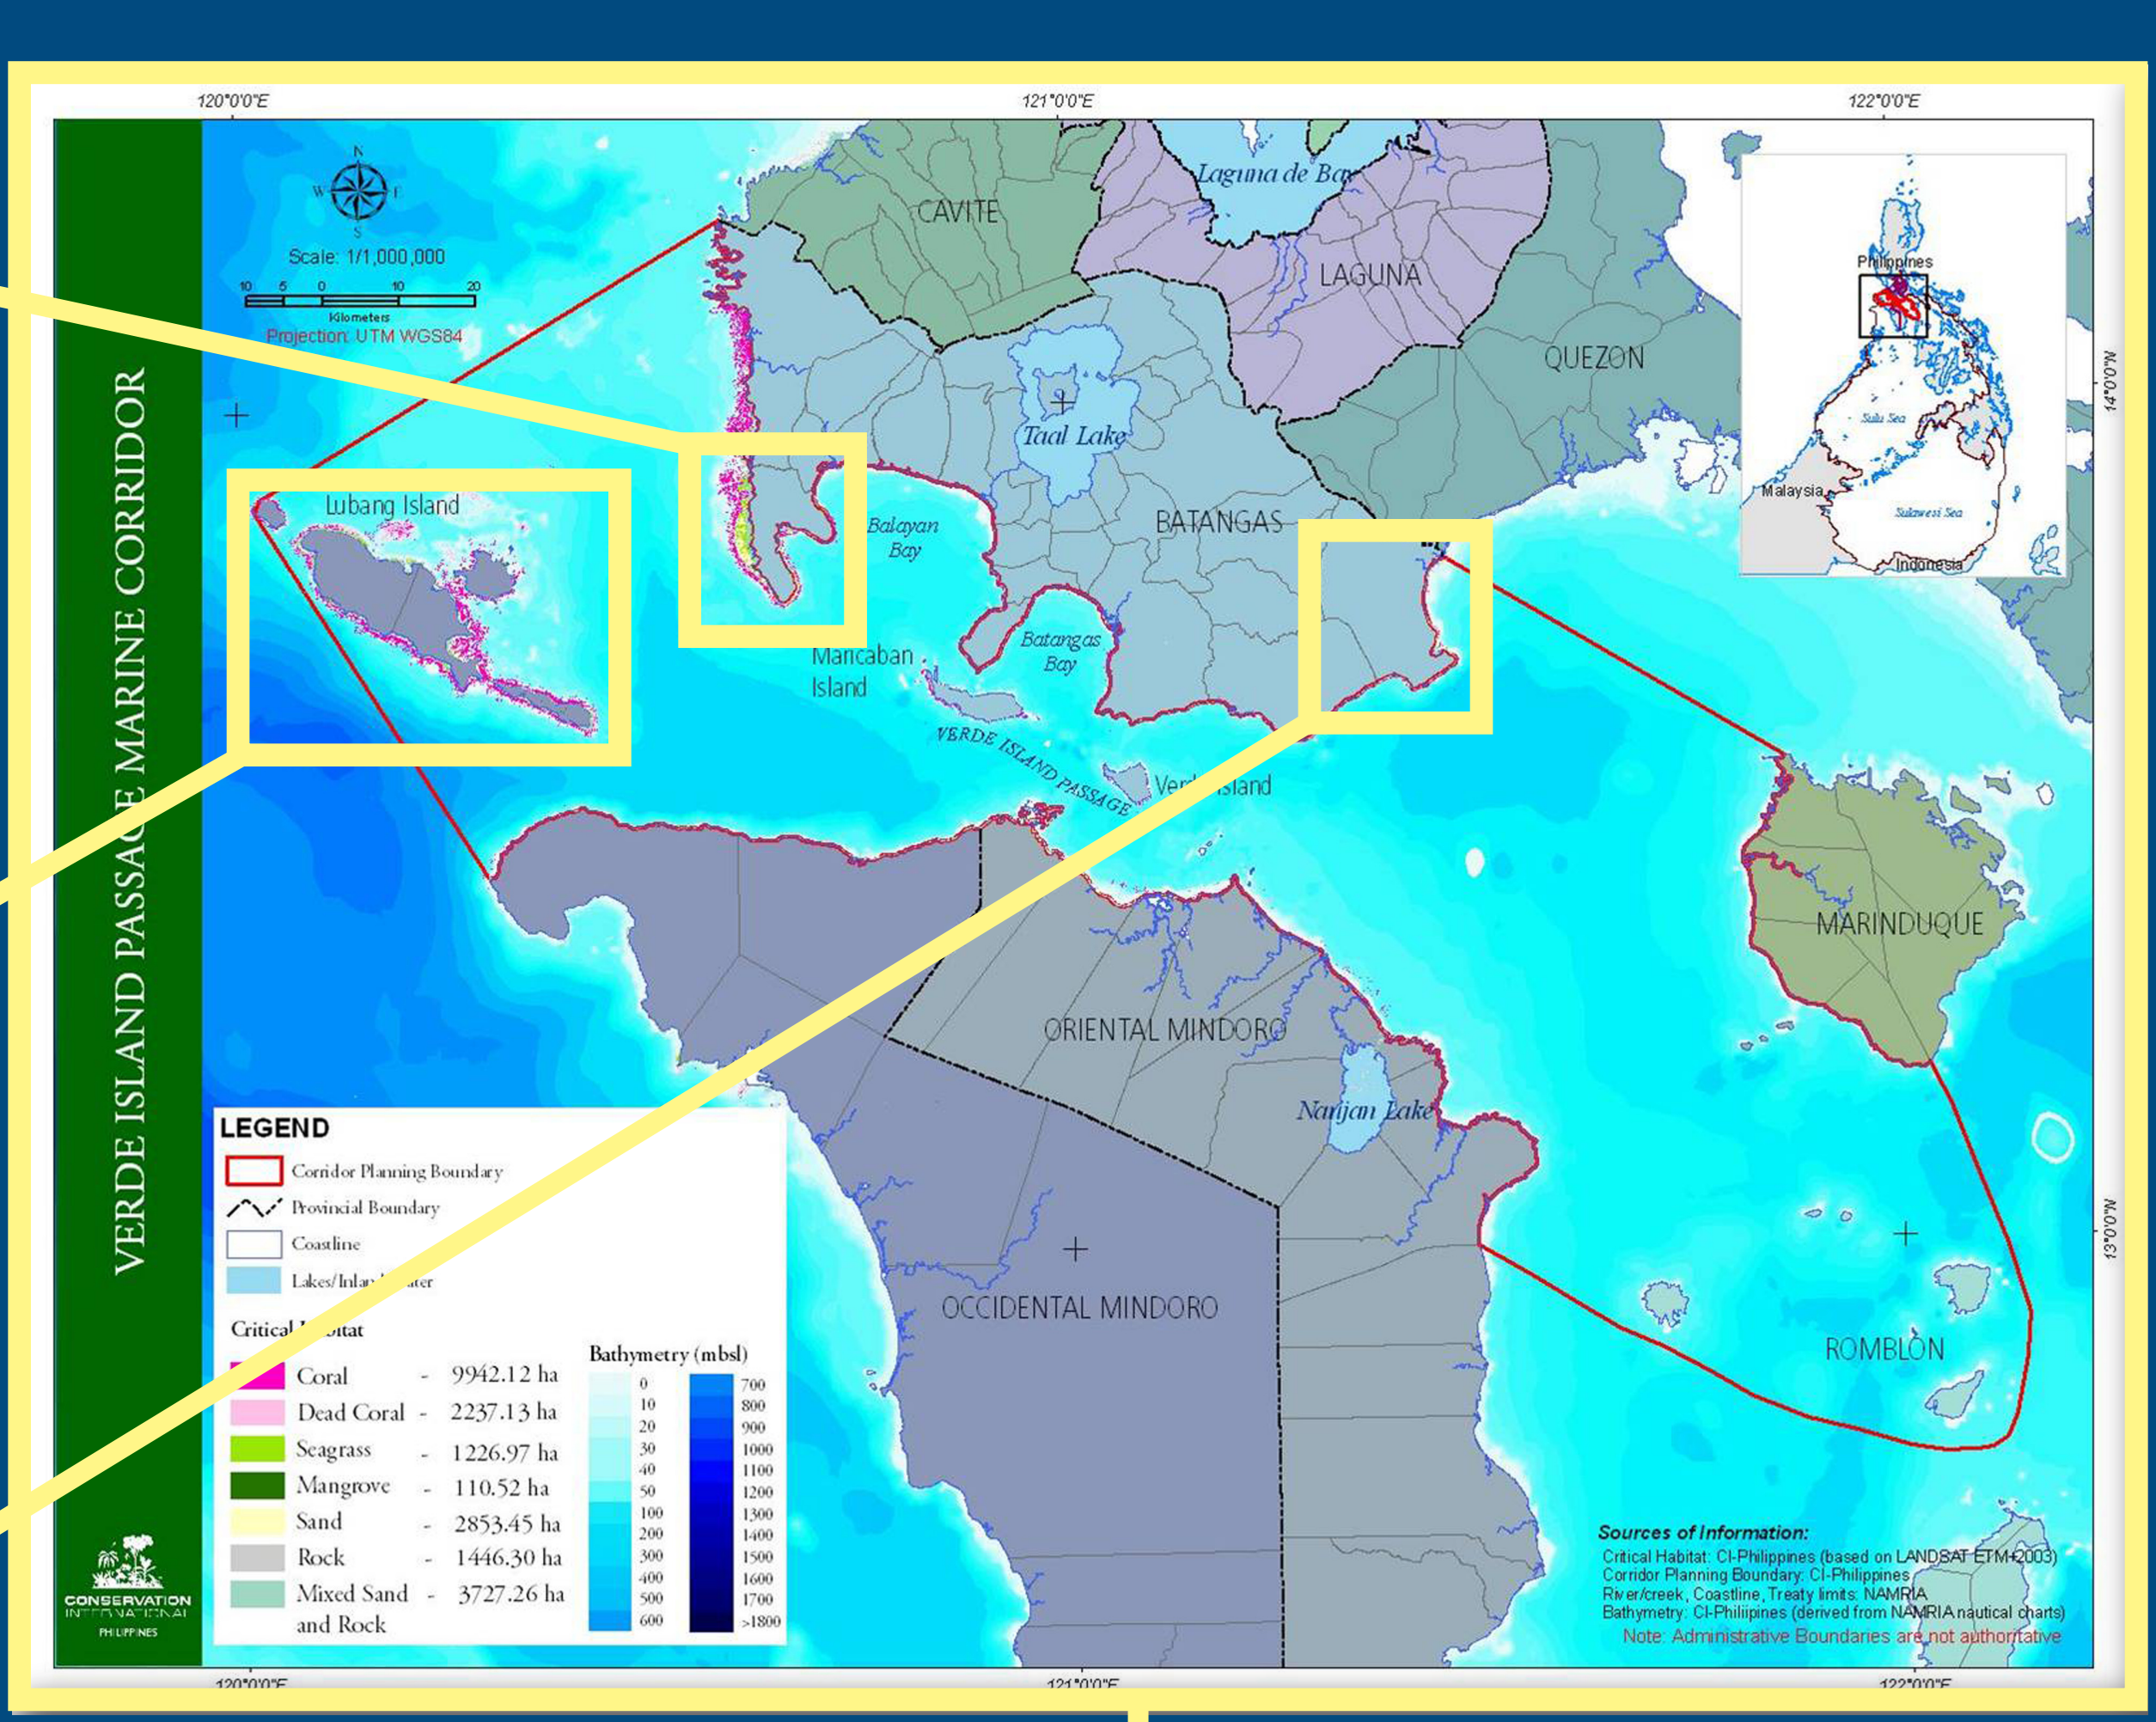

Piloting mangrove rehabilitation efforts to safeguard coastal communities from climate change impacts in Calatagan, Batangas

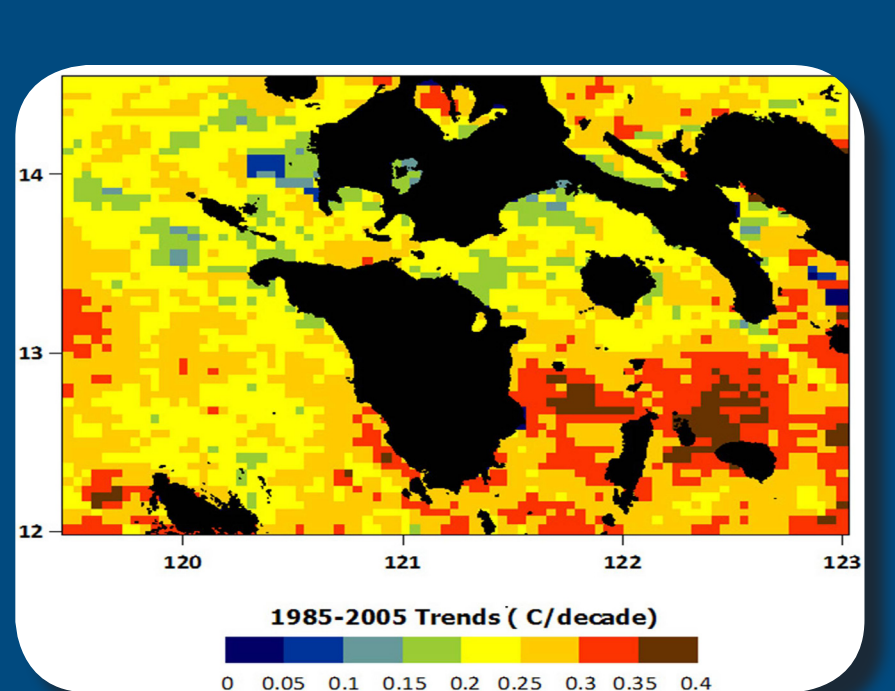

Climate-SMARTing the Lubang-Loooc MPAs and developing a Climate Change Adaptation Plan for Lubang Island

Reducing impacts of "dulong" fishing as entry to Ecosystem Approach to Fisheries Management in San Juan, Batangas

Refining and applying climate change vulnerability assessment modules

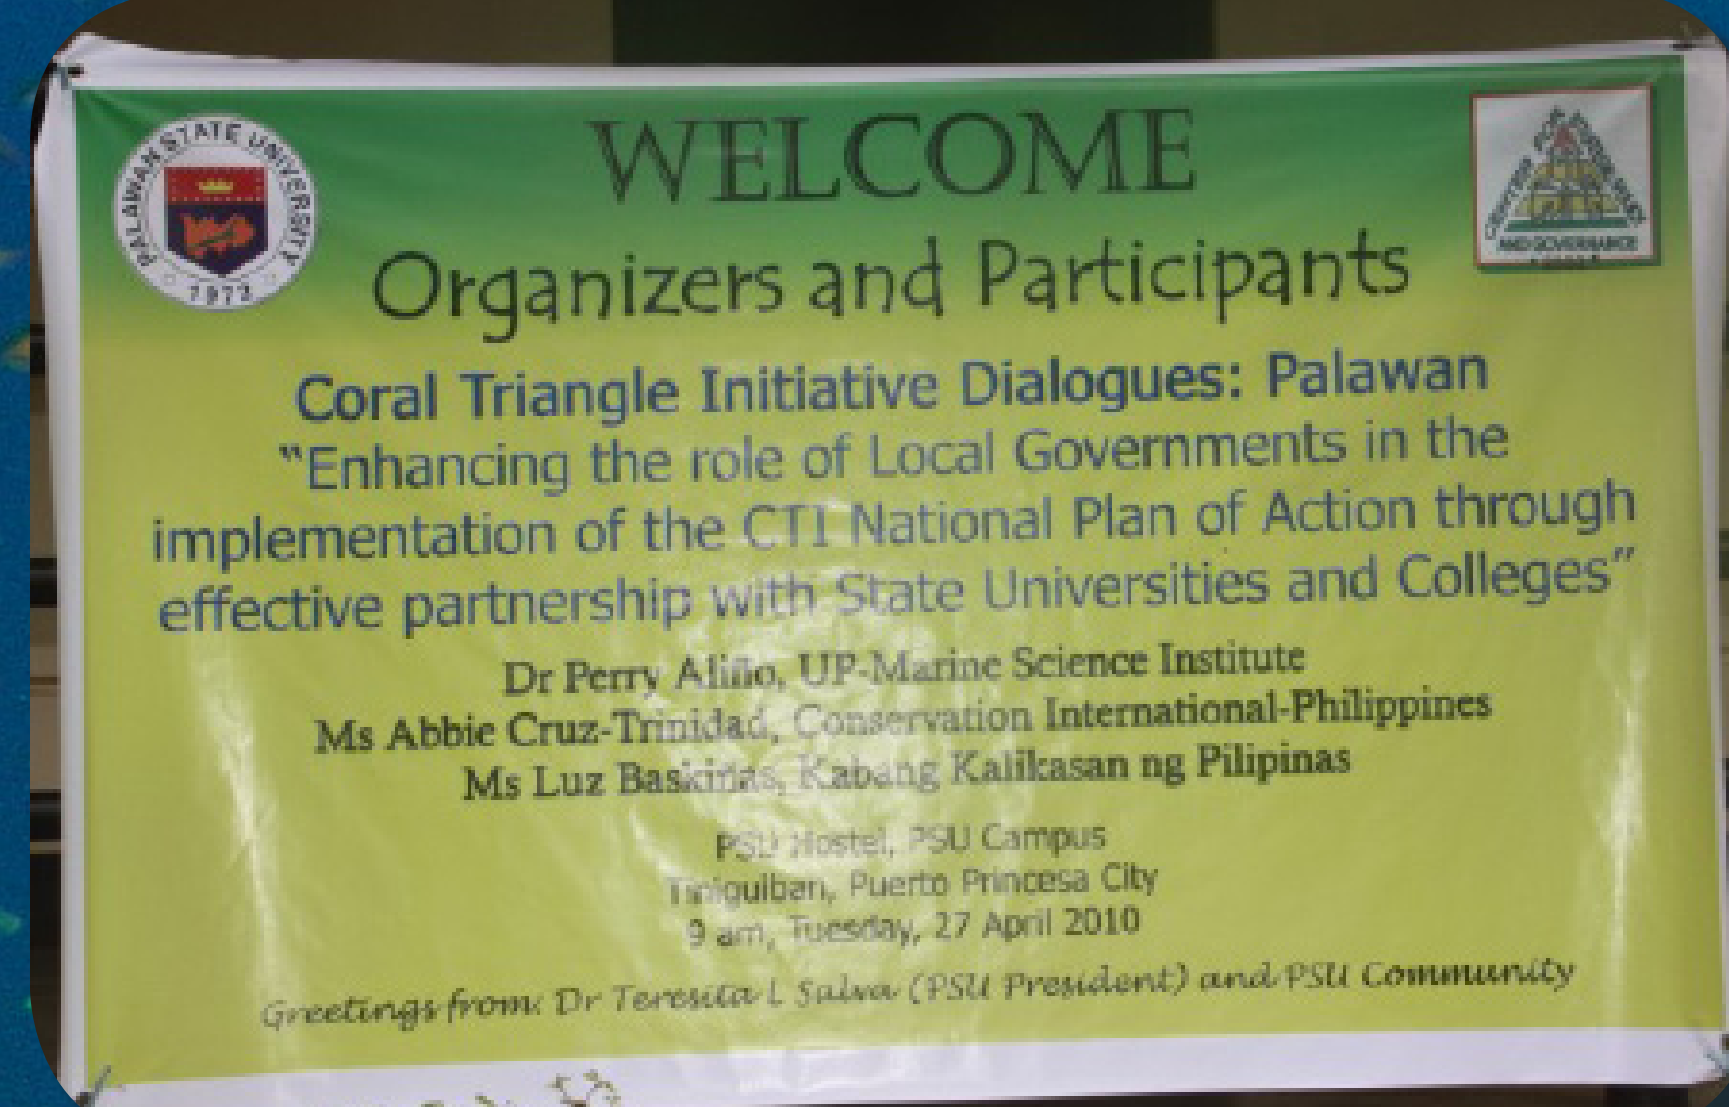

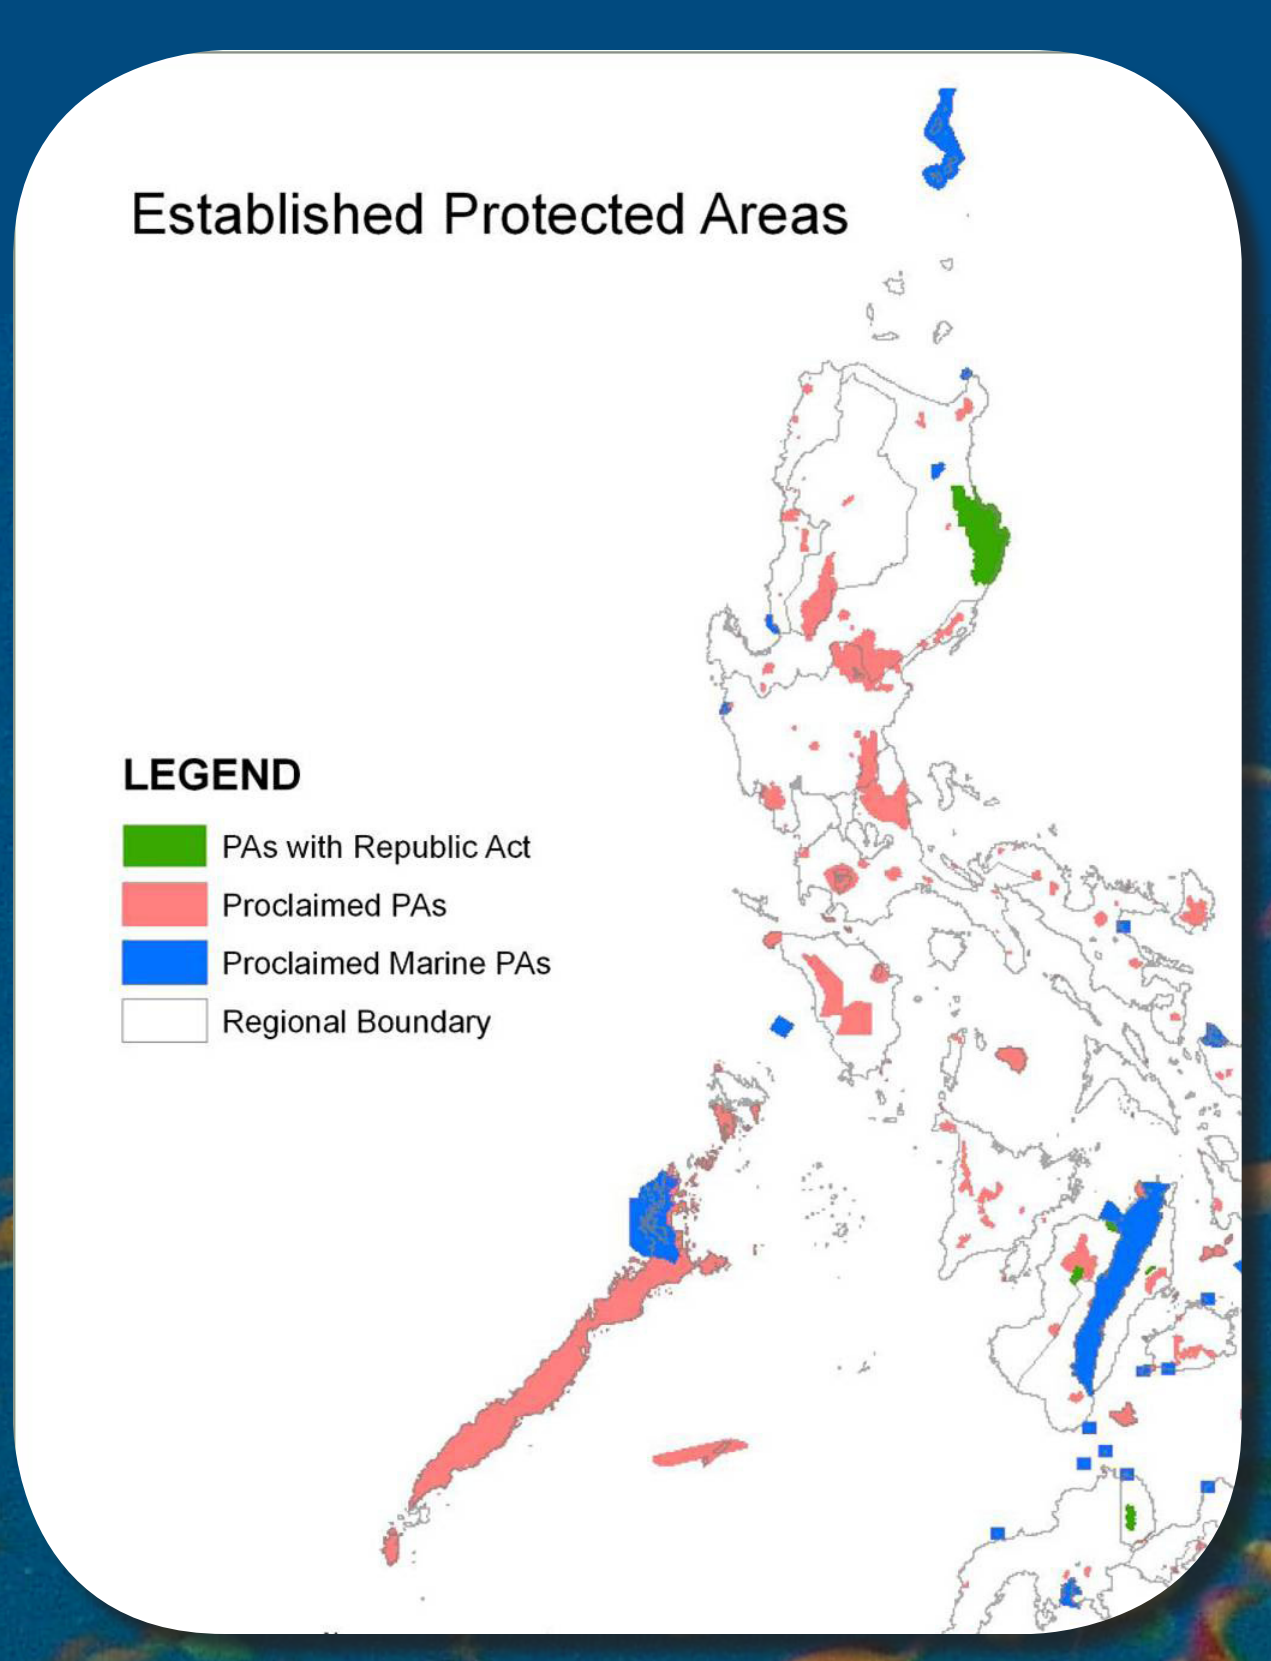

Working at seascape scales

Developing a management and investment plan for the South China Sea Seascape

Assessing Management Effectiveness of Marine Protected Areas and seascapes within the National Integrated Protected Areas System (NIPAS)

Capacity-building of Higher Education Institutes (HEIs) to assist LGUs in the implementation of the Philippines' NPOA
